

scaffolding course

FTS Safety offers a one day Scaffolding Training course for unit standard 10085

FTS Safety's Scaffolding course allows you to understand relevant legislation and order the correct scaffold equipment in order to meet the specifications of SANS 10085 and SABS

Duration: 1 Day

Legislation: Section 17 & 18 of the Occupational Health and Safety Act & SANS 10085

This course equips participants with the skills to safely erect, inspect, and dismantle scaffolding in compliance with safety regulations. It covers scaffold types, load capacity, hazard identification, and best practices for working at heights. Anyone responsible for erecting or inspecting scaffolding must be certified, making this training essential for construction workers, site supervisors, and safety officers.
