

Work At Height Basic Fall Arrest Systems & Rescue Training

FTS Safety Offers 1 Day Work At Height Basic Fall Arrest Systems & Rescue Training for unit standard 229995

Unit Standard 229995 – Work At Height Basic Fall Arrest Systems & Rescue Training
1 Day Course

We don't offer this course as a public class. A minimum of 5 candidates is required to facilitate it.

This course provides learners with the knowledge and practical skills to install, use and perform basic rescues from fall arrest systems and to interpret and implement a fall protection plan when working at height. It focuses on safety, equipment selection, correct system setup, equipment inspection and basic rescue techniques in compliance with applicable safety regulations.

What You'll Learn:

- Explain the use of a range of fall arrest equipment and relevant safety regulations
- Tie and use basic rope knots for fall protection and rescue
- Install and use fall arrest systems correctly
- Inspect, assemble and fit fall arrest equipment safely
- Interpret and implement a fall protection plan
- Perform basic fall arrest rescues and casualty retrievals safely

What you can expect from the FTS Training Academy

- Experienced & Accredited Facilitators
- Training Venues for public classes in Durban, Cape Town and Johannesburg
- Training at your premises for 5 or more learners
- Competitive prices
- Certificate for learners found competent

Benefits

-  Certification & Accreditation on completion
-  Graphic and interactive course design
-  Designed for positive practical results
-  Guaranteed value

WHAT YOU GET:

Course participants will be provided with stationery, manuals, workbooks, and refreshments. Upon completion, certificates will be issued.
